# What is Sensi Face Lift?

## Do you feel like creams and massages are no longer enough?

Sensi Face Lift is a modern stimulator that works biologically – it activates your skin's natural regeneration, without the "overdone" effect.

- Hydrates
- Protect
- Restores radiance

*For your skin that needs something more to look fresh and healthy again.*

## Formula - Science in the Service of Beauty

The effectiveness of Sensi Face Lift lies in its four-tiered biological power, harmoniously combining hydration, regeneration, and skin protection. Each ingredient is precisely selected to work in synergy with the skin's natural processes – only more effectively than nature alone.

## Ingredients

• Trehalose – 10 mg/ml

### HYALURONIC ACID – 25 mg/ml

**(high molecular - weight non crosslinked)**  
Forms an invisible moisturizing film on the skin's surface, like a soft blanket that locks in hydration and smooths skin texture. Delivers immediate results.

### HYALURONIC ACID – 25 mg/ml

**(low-molecular - weight non crosslinked)**  
Penetrates deeper into the tissue, promoting long-term hydration and improving skin resilience. It's an investment in your skin's future.

**sénsi FaceLift.**

### POLYNUCLEOTIDES (PDRN) – 10 mg/ml

A biological reset for skin cells – they stimulate fibroblasts to produce collagen, accelerate regeneration, and restore firmness your skin may not have felt in years.

### TREHALOSE – 10 mg/ml

A protective sugar with extraordinary properties – shields cells from oxidative stress, soothes, stabilizes, and supports faster recovery after treatment, leaving the skin looking fresh and healthy.

This powerful quartet works in perfect harmony – like a well-coordinated team – delivering both immediate comfort and glow, as well as long-term improvement in skin quality.
